Lesson 4-3 · Period 1 · Do Now

Name: _____ Period: _____ Date: _____

Do Now

EXPLORE REASON

Consider the following graph of the function $y=x+2$.

[GRAPH / TIKZ figure]

- A. What is the domain of this function?
- B. Sketch a function that resembles the graph, but restrict its domain to exclude 2.
- C. Use Structure Consider the function you have sketched. What kind of function might have a graph like this? Explain.

Sample Student Work:

- A. all real numbers.
- B. [GRAPH / TIKZ figure]
- C. An equation where the denominator equals zero when $x=2$. For example, $y=(2x-4)/(x-2)$.
