

FULL NAME: _____

BLOCK: _____

L54 P1

Lesson 5-4 · Period 1 · Do Now

Name: _____ Period: _____ Date: _____

Do Now

EXPLORE REASON

A. Solve $3(a + 1)^2 + 2 = 11$. *Use at least two different methods.*

B. Try each of the methods you used in part (a) to solve $3(a + 1) + 2 = 11$.

C. Generalize Which of the methods is better suited for solving an equation with a radical? What problems arise when using the other method?
