BLOCK: _____

L65 P1

Lesson 6-5 · Period 1 · Do Now

Name: _____ Period: _____ Date: _____

Do Now #1 — Error Analysis: Change of Base

Error Analysis A student wants to approximate $\log_2 9$ with her calculator. She enters the equivalent expression $\frac{\ln 2}{\ln 9}$, but $\log_2 9 = (\ln 2)/(\ln 9)$

Do Now #2 — Expand: $\log_6(49/5)$

Use the properties of logarithms to expand each expression. $\log_6 \frac{49}{5}$

Do Now #3 — Condense: $5 \ln s + 6 \ln t$

Use the properties of logarithms to write each expression as a single logarithm. $5 \ln s + 6 \ln t$
