Topic 3 Assessment Day — Gentle Warm-Up

Lesson 3-5 · Period 4 · Do Now

[TARGET] BEFORE THE ASSESSMENT

This is just a warm-up. Don't overthink it. Pick **one** problem you feel confident about and write it clearly. Breathe. You know this.

Warm-Up #1

Sketch the graph of the function by finding the zeros:

$$g(x) = (x + 3)(x - 1)(x - 4).$$

Warm-Up #2

Find the zeros of the function, and describe the behavior of the graph at each zero:

$$f(x) = x^3 - 8x^2 + 16x.$$
